

Test of the new tags:

The best results are get by setting max 2 of the for “consider_..” options !!!!!!!

To test „consider_river”

http://brouter.de/essbee/#map=9/52.3681/9.6913/osm-mapnik-german_style&lonlats=9.920139,51.529144;9.717402,52.373399

(using consider_elevation + consider_river, Brouter calculates a route very near the bike-route “Leine-Heide”)

http://brouter.de/essbee/#map=10/49.9393/8.9833/osm-mapnik-german_style&lonlats=8.699145,50.054948;9.070573,49.918035

(using consider_elevation + consider_river, Brouter calculates a route along the river “Main”)

Consider all

http://brouter.de/essbee/#map=11/49.9777/9.0139/osm-mapnik-german_style&lonlats=8.692251,50.049204;9.243705,49.709486

Consider Forest

<http://brouter.de/essbee/#map=10/49.2459/8.3187/standard&lonlats=8.350938,49.540307;8.124374,49.107132>

(using “consider_forest” alone)
